

# WHAT IS EASYSUSTA INABILITY? OUR GOAL

Easysustainability, or ES, is a freshly established NGO which aims at disseminating sustainability among the general public, operating on the EU level. ES was developed in the summer of 2022 by Kingsley Okonkwo and Federico Quarantesi, and can now count on more than 50 volunteers! The NGO has been established in March 2023.

Our goal is to make green know-how more accessible also to the general population. We want to provide young people with networking opportunities, working projects and MOOCs to enhance their skills and knowledge. Easysustainability promotes more sustainable and circular answers in different areas of society (industry, academia, nonprofits and more). Easysustainability aims to find innovative solutions to the world's most pressing environmental challenges.

## WHAT DO WE DO?

We realize our goal through project variety: from sustainable entrepreneurship to pro-bono consulting projects to firms and other bodies that want to become more sustainable. From creating a database accessible and understandable by anyone to social media campaigns encouraging good practices. Each of our associates is free to contribute to the projects that attract them the most

## OUR VALUES

Integrity, Teamwork, Fairness, Diversity and Inclusion, Transparency, and Responsibility

# Turkey- Syria emergency response

---

HELP THOSE IMPACTED BY THE  
EARTHQUAKES IN TURKEY AND  
SYRIA

Your donation will fund  
emergency aid to support  
those affected. If you can't  
donate, please raise  
awareness.
